

Cake Breaker

To break linen cake
for the next step of production

SPECIFICATION

Standard Features :

- This Cake Breaker is an Excellent, Simple and Precise way of handling cakes in a material handling laundry situation that loosens and not tangles the sheets for the next step of production.
- To Break Linen Cake into a Loose, Tangle less mass for easy & fast handling by Picker or Human for next step processing.
- When the control calls for a cake, A Cake falls into the rotors from a conveyor above.
- Specially Designed rotors have been built and tested to pull the cake gently into the unit, which smoothly and evenly breaks the cake into a very loose configuration.
- The controls have timers in them, which reverse the rotors which loosens the cake into a Tangle less mass by reversing and forwarding the rotors alternatively.
- This action Untangles the linen smoothly and reliably and due to the special design of the rotors, the linen falls though only when its untangled to a certain degree, falling though the rotors to the conveyor below, which then can be either presented to a overhead rail system bag loading or a bin for staff to pull the sheets out very easily.

Technical Information :

MODEL			XT-CB 60	
Units of Measurement	Metric	US		
Capacity	kg.	lbs.	60	132
Overall Dimensions :				
Machine Width	mm.	inch	1400	55
Machine Height	mm.	inch	3700	146
Machine Depth	mm.	inch	3300	130
Net Weight (approx.)	kg.	lbs.	1150	2535
Domestic Shipping Weight	kg.	lbs.	1230	2712
CYLINDER INFORMATION				
Motor :				
Helical Geared (2 sets)	kW	HP	1.1	0.8
Overall Dimensions :				
PLC Control	-		Yes	
Control Voltage	V		24	
Voltage	V		3x400V (+/-5%) 50-60 Hz	

Specification of design is subject to change without notice.
