X-Dryer High Efficiency Dryer

MODEL: XD-60, XD-90, XD-120, XD-180

INDUSTRIAL HIGH PRODUCTIVITY DRYERS

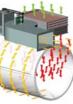

LARGE CAPACITY >FLEXIBILITY >BUILT TO LAST > PROTECT YOUR INVESMENT

- The X-Dryer Series is the perfect match for tunnel washing system operation.
 With capacity ranges from 100-kg up to 200-kg (225-450 pounds) makes our dryers range suitable for most tunnel washers capacities. Just ask and the dryer that suits the application can be built. Quality material and workmanship make the X-Dryer Series reliable and long lasting.
- Microprocessor and Computer Control The X-Dryer Series control is capable of linking with the central control to work as a single system. The control monitors the temperatures, drying action and the performance with unsurpassed accuracy to ensure trouble free operation. The computer

helps enhance safety in the laundry by verifying airflow and monitoring the temperature sensor and door.

Heated Air Flow Circulation Diagram through the Steam Coil, Rotating Basket and extracted out by the suction Blows to the exhaust duct.

- Air Flow Diagram The flow of the air through the basket is designed for optimum energy consumption
- Stainless Steel Basket

The stainless steel 304 (18/8) cylinder is supported by four 11 inch diameter high temperature wheels. The wheels are adjustable keeping the cylinder in position at all times. The wheels on one side are connected to a shaft and a gear motor that drives the cylinder.

Lint Filter and Lint Compartment

The lint filter is efficient and provides a good airflow that reduces energy consumption. The control monitors the lint filter and stops the machine should the lint screen become blocked. It is easily accessible from the side.
